CPA Exam Tips for Taxation Specialization

Tip #1	Be sure to apply for your Notice to Schedule in plenty of time.
Tip #2	<p>Consider taking AUD before entering the MAcc program. The AUD section of the CPA Exam covers the entire auditing process, including auditing procedures, generally accepted auditing standards, standards related to attest engagements, and the AICPA Code of Professional Conduct. These topics are covered in ACT441.</p>
Tip #3	<p>Consider taking BEC before the start of Spring semester. BEC covers corporate governance, economic concepts and analysis, financial management, information systems and communications, strategic planning and operations management. One unique aspect of the BEC exam is that it requires the candidate to prepare and submit three Written Communication responses.</p>
Tip #4	<p>Consider taking REG and FAR after Spring semester. The REG section of the CPA Exam tests a CPA candidate’s knowledge on federal taxation, business law, business ethics and professional and legal responsibilities. More than 60% of the REG exam focuses on federal taxation. ACT 561 and ACT 631 cover topics tested in REG.</p> <p>FAR requires that CPA candidates have a strong knowledge of US GAAP, including concepts and standards for financial statements, typical items in financial statements, specific types of transactions and events, accounting and reporting for governmental entities, and accounting and reporting for nongovernmental and not-for-profit organizations.</p>
