

Computer Information Systems Concentration

The Department of Computer Information Systems is a leader in technology, setting the standard for IT education. The curriculum evolves continuously to ensure that your degree features the most useful and up-to-date material valued in the industry.

What Do Computer Information Systems Professionals Do?

Information Technology (IT) professionals are responsible for helping information flow through organizations, which enables all other functions of business to be efficient and profitable. Some of the activities in this occupation may include analyzing systems; evaluating processes and developing/ proposing/implementing ways to facilitate enhanced efficiency and/or profitability of those systems; programming; trouble shooting; training users and other developers; writing documentation for systems (“technical writing”); creating and maintaining databases; testing systems; consulting; and creating and maintaining websites. Careers in IT are exciting, fast-paced, challenging, ever-changing, and sometimes unpredictable. New tools and methods are often available and new skills must be continuously developed in order to stay competitive and marketable.

According to the U.S. Bureau of Labor Statistics, CIS jobs are expected to grow by 12 percent from 2018 to 2028, which is about twice the national average for all occupations. The median annual salary for CIS jobs is more than double compared to other industries.
