

Colorado State University Supply Chain Management Forum

Vision

The CSU Supply Chain Management Forum will facilitate interaction among partner companies, CSU supply chain faculty, and CSU supply chain students.

Mission

The mission of the forum is to provide resources for its partners and their companies as they explore critical issues and opportunities to enhance the success of their supply chains. Resources include access to current and relevant faculty research, other partners that have faced or are currently facing similar issues, top supply chain students, and external topic experts as needed.

Commitment and Value

Partners that desire a basic level of interaction can commit to a project partnership for a gift of \$5,000. Included in this level are the following:

- A semester-long student team consulting project designed by the company and the practicum director and focused on solving a current issue faced by the company.
- Access to the top supply chain students (as recommended by faculty) for internships and full-time positions.

Partners that desire a higher level of interaction can commit to an annual (calendar or school year) full partnership for a gift of \$10,000. Included in this level are all of the above as well as the following:

- Participation of a top SCM on the Forum Board of Advisors which sets the annual strategy for the forum and its operations.
- Seats at each forum meeting (one in the fall and one in the spring), which will present research on current trends, best practices and other topics and allow for networking with other stakeholders. Partners may choose to invite a supplier and/or customer representative to accompany them at a forum meeting as one of their seats.
- Ability to help design the program of information presented at the forum meetings.
- Opportunity to dialogue and develop relationships with peers in other supply chain organizations.
- Access to white papers, best practice studies and other documents that result from forum meetings, as well as early access to published faculty research.
- Ability to influence the development and refinement of the content of CSU supply chain courses.

Partners that desire to support CSU SCM even further through student scholarships, forum activities, or faculty research or consulting, should contact the Forum Director for further discussion.
